RSA Assignment

**Name:**Mahmoud Reda Sayed
Id: 9203399
Sec: 2
BN: 21

Time Analysis:

Comment:

Increasing the number of the bits will increase the delay of the encryption and decryption and at a specific point the delay will make a big jump in the time

Attack Analysis:

Comment:

     When the number of the bit increases the delay will increase And this test for a small number of bits , if we use 1024 bits or bigger , it may take hours or days of continuous work
